Box IV TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

NEW ABSTRACT

An ink jet print head comprises a print head matrix (110) having nozzles (112) for drop formation and release opening ont a print side surface (118) of said matrix and individual local micro-reservoirs (116), each associated with local nozzles . The reservoirs (116) open onto an ink supply surface (120) of the matrix and are supplied with ink by capillary action from wiping or spraying of ink regularly refreshed onto the ink supply surface. The design allows for a print head that substantially covers the area of the print media and thus permits stationary printing. Printing is rapid and the ink supply arrangement allows for reliable ink supply at atmospheric pressure.
